

Introduction

Business Analysis plays a pivotal role within an organisation, helping to identify business needs and determine solutions to business problems. The BCS Diploma in Business Analysis (formerly the ISEB Diploma in Business Analysis) is the international, industry-recognised qualification that truly demonstrates the knowledge, skills and capabilities to be an effective Business Analyst.

The BCS Business Analysis Diploma is awarded on successful completion of examinations in two Core modules, one Knowledge-based specialist module and one Practitioner specialist module, followed by a face-to-face oral examination where candidates demonstrate their business, technical and interpersonal skills.

**BCS PROFESSIONAL
CERTIFICATION**
(formerly ISEB)

BCS, The Chartered Institute for IT, is the leading institute for IT professionals around the world. The BCS Professional Certification portfolio offers internationally recognised qualifications for IT professionals.

BCS Diploma Learning Path

You can complete the following courses leading to the BCS Business Analysis Diploma in any sequence. However we recommend starting with the core modules. You can book any of the courses individually or alternatively, purchase a BCS Diploma in Business Analysis Training Passport - this includes training and examinations for all four modules with a discount on the overall cost. You can also save without the upfront payment of the passport, with our Pay As You Go Plan.

**Accredited
Training Organisation**

Core Modules:

BUSINESS ANALYSIS PRACTICE

3 DAY COURSE

This course will enable delegates to:

- Demonstrate an understanding of business strategy and strategic analysis techniques
- Act as effective members of a team investigating an organisation's business systems with a view to recommending business improvements
- Apply techniques in order to analyse and model business systems
- Identify recommendations for business improvement
- Assist in the production of a rigorous business case covering the development and implementation of business changes
- Identify how business requirements may be supported by IT systems
- Prepare for the Business Analysis Practice examination

REQUIREMENTS ENGINEERING

3 DAY COURSE

This course will enable delegates to:

- Understand the requirements life cycle:
 - elicitation
 - analysis
 - management
 - validation
- Understand problems of deriving a clear and acceptable requirements document
- Understand how to manage an evolving requirements document
- Prepare for the Requirements Engineering examination

(continued overleaf)

Knowledge-based Specialism:

ORGANISATIONAL BEHAVIOUR

2 DAY COURSE

This course will enable delegates to:

- Understand Organisational Principles including delivering value, structure, budgets, jobs, management and rules
- Explain operating models including structures and boundaries
- Appreciate organisational motivation, behaviour and culture
- Understand group formation, dynamics and networks
- Define the principles of financial reporting including balance sheet, income statement, cash flow, costing and pricing
- Understand project finance including costs and benefits, payback, discounted cash flow and internal rate of return
- Prepare for the Organisational Behaviour examination

Practitioner Specialism:

MODELLING BUSINESS PROCESSES

2 DAY COURSE

This course will enable delegates to:

- Identify and model core business processes at both the organisational and operational levels
- Analyse activities within business processes
- Analyse managerial and performance aspects of activities and processes
- Evaluate and re-design business processes
- Measure the effectiveness of the change
- Prepare for the Modelling Business Processes examination

Oral Examination

Having successfully passed the four required modules, candidates must then sit a 50 minute face-to-face interview-style oral examination with two BCS examiners. It is recommended that candidates sit this within one year of completing the pre-requisite modules. Successful candidates will be awarded the BCS Diploma in Business Analysis.
