

SCALED AGILE
FRAMEWORK
SAFE AGILIST

THE SCALED AGILE FRAMEWORK®

The Scaled Agile Framework (pronounced SAFe™) is a proven, publicly available framework for applying Lean | Agile practices at enterprise scale. It has been successfully applied in programs of only 50-100 people, and in enterprises employing thousands of software developers.

The Scaled Agile Framework interactive knowledge base can be accessed through a “Big Picture” graphic at www.scaledagileframework.com. It highlights the individual roles, teams, activities and artifacts necessary to scale agile from the team to program to the enterprise level.

CERTIFIED SAFE AGILIST: LEADING SAFE (SCALED AGILE FRAMEWORK)

This two-day course equips you with the knowledge necessary to lead an enterprise agile transformation by leveraging the Scaled Agile Framework, with its underlying principles of lean thinking, and product development flow. You will leave with an understanding of how the principles and practices of the framework support Lean Thinking, Agile Development, SAFe ScrumXP, Agile Release Train, Agile Portfolio Management, Agile Architecture, and Scaling Leadership.

Course Objectives

This course will enable delegates to:

- Apply lean, agile and product development flow principles to improve productivity, employee engagement, time to market, and quality
- Apply the Scaled Agile Framework based on lecture, real-world examples, and insights by Scaled Agile experts
- Understand the skills necessary for an enterprise transformation based on the information and examples presented, and additional recommended readings and resources
- Gain the insights into the leadership skills most effective in unlocking the intrinsic motivation of software development knowledge workers, and begin applying them in your context
- Prepare for certification as a Scaled Agile Framework Agilist (SA)

Who Should Attend

Those who are responsible for leading a Lean | Agile change initiative in the larger software enterprise, including:

- Executives
- Business Managers
- Product Managers
- Agile Change Agents
- Agile Consultants / Coaches

Course Duration: 2 days

Course Code: CSA

Detailed Course Content

Intro to SAFe

Introduction to the Scaled Agile Framework™

Lean Thinking

An overview of Lean Software Development and Product Development Flow

Agile Development

Application of Agile development in the enterprise context
Business Benefits

SAFe ScrumXP

An experiential walkthrough of “SAFe ScrumXP”, focusing on scalable technical, project management and economic privatisations practices that enable scaling to the program and portfolio level

Agile Release Train

Identification, implementation and execution of Agile Release Trains — long-lived programs whereby teams-of-agile-teams optimise quality and velocity delivery for the enterprises larger value streams

Agile Portfolio Management

Agile transformational patterns for Strategy and Investment Funding, Program Management, and Governance

(continued overleaf)

Pre-requisites, evening study and examinations

There are no pre-requisites to attend. However, those seeking certification as a Scaled Agile Framework Agilist (SA) should have 5+ years of experience in software development, testing, business analysis, product or project management, with experience in Scrum. Delegates are eligible to take the Scaled Agile Academy SAFe Agilist exam on-line within 10 days of the course.

Detailed Course Content (continued)

Agile Architecture

Principles of Agile Architecture, role of System and Enterprise Architects, and Architecting with Flow

Scaling Leadership

Scaling Enterprise Lean | Agile leadership
